

Daniel Björkegren is an Assistant Professor at Columbia University School of International and Public Affairs (SIPA). He works on digital transformation and applied machine learning, with a focus on developing economies. He works on methods to make algorithms more humane: robust, transparent, and better aligned with societal values. He is an affiliate of the Bureau for Research and Economic Analysis of Development, and MIT's Jameel Poverty Action Lab. He holds a Ph.D. in Economics and a Master's in Public Policy from Harvard University, and a Bachelor degree in Physics from the University of Washington.
